Mouser Electronics Sponsors Digi Webinar on Networking Strategies for Remote Workers

April 9, 2020 – [Mouser Electronics](http://www.mouser.com), Inc., the New Product Introduction (NPI) leader empowering innovation, is proudly sponsoring a new webinar from [Digi](http://www.digi.com)® titled “[Secure, Reliable Connections: Networking Strategies for Remote Workers](https://www.digi.com/resources/webinars/secure-reliable-connections-networking-strategies-for-remote-workers).” In the webinar, Digi’s Director of Product Management, Randall Kerr, will discuss how companies can better prepare workers and protect data security as the home-based workforce becomes the new standard in response to the COVID-19 pandemic. [Register now](https://www.digi.com/resources/webinars/secure-reliable-connections-networking-strategies-for-remote-workers) for the webinar, which occurs at 10 a.m. CDT on April 14, 2020, and will be available on demand after the event.

While the remote worker scenario has become increasingly common over the past several years, the recent spread of COVID-19 has changed everything, demonstrating what happens when virtually the entire workforce from thousands of companies must suddenly begin working remotely. This shift has caused enormous strain on corporate network infrastructure, and increased security vulnerabilities, while straining the ability of IT groups to monitor and correct issues for employees across an increasingly distributed workforce.

Remote workers’ home Wi-Fi can present risks to proprietary data and confidential internal communications. Fortunately, it is possible to provide commercial-level security at an affordable cost with connectivity solutions from Digi.

Digi’s [cellular extenders](https://www.digi.com/resources/webinars/secure-reliable-connections-networking-strategies-for-remote-workers) deliver secure, reliable, high-performance connectivity in a compact, all-in-one solution at low cost, and integrate seamlessly with an existing infrastructure. Digi [Connect® IT console servers](https://www.digi.com/resources/webinars/secure-reliable-connections-networking-strategies-for-remote-workers) provide IT teams with remote, out-of-band access so they can remotely troubleshoot and remediate issues, wherever they may occur across the workforce. Digi [Remote Manager®](https://www.digi.com/resources/webinars/secure-reliable-connections-networking-strategies-for-remote-workers) enables IT teams to have complete control and can easily and securely monitor and configure devices remotely. And all of these solutions enable organizations to offer flexible work arrangements long into the future.

As an authorized distributor, Mouser Electronics is focused on the rapid introduction of new products and technologies, giving customers an edge and helping speed time to market. Over 800 semiconductor and electronic component manufacturers count on Mouser to help them introduce their products into the global marketplace. Mouser’s customers can expect 100% certified, genuine products that are fully traceable from each manufacturer.

With its broad product line and unsurpassed customer service, Mouser strives to empower innovation among design engineers and buyers by delivering advanced technologies. Mouser stocks the world’s widest selection of the latest semiconductors and electronic components for the newest design projects. Mouser Electronics’ website is continually updated and offers advanced search methods to help customers quickly locate inventory. Mouser.com also houses data sheets, supplier-specific reference designs, application notes, technical design information, and engineering tools.

About Mouser Electronics

Mouser Electronics, a Berkshire Hathaway company, is an award-winning, authorized semiconductor and electronic component distributor focused on rapid New Product Introductions from its manufacturing partners for electronic design engineers and buyers. The global distributor's website, Mouser.com, is available in multiple languages and currencies and features more than 5 million products from over 800 manufacturers. Mouser offers 27 support locations around the world to provide best-in-class customer service and ships globally to over 630,000 customers in 223 countries/territories from its 750,000 sq. ft. state-of-the-art facility south of Dallas, Texas. For more information, visit www.mouser.com.

About Digi

Digi is a leading global provider of mission-critical machine-to-machine (M2M) and Internet of Things (IoT) connectivity products and services. Digi helps customers create next-generation connected products and deploy and manage critical communications infrastructures.
